

Inclusive Router Options

As standard all our leased line options up to 1Gb, regardless of contract length, come with an inclusive router. We have supplied details of the options we present below.

Leased Line (all carriers)	Router	Rack Mount Brackets
Fibre 100Mb Bearer	Ubiquiti ER-4	£30 (if required)
Fibre 1Gb Bearer	Ubiquiti ER-4	£30 (if required)
Fibre 10Gb Bearer	Wires Only	-
EoFTTC / GEA / EFM	Cisco 887	-
ADSL / FTTC Failover	Cisco 887	-
Point-to-Point	Wires Only	-
Wireless	Ubiquiti ER-4	£30 (if required)

Ubiquiti ER-4 / ER-6 / ER-12

- o The Ubiquiti ER-4 is a fanless and silent modern router.
- o Depending on stock availability and presentation requirements we may interchange this model with the ER-6 and ER-12 which are similar in appearance.
- o Supplied for all 100Mb and 1Gb bearer connections
- o Brand new unit.
- o Supplied with power cable and instructions in the box.
- o Should you wish a rack mount kit additional costs apply.
- o Should a hardware failure occur we will ship a replacement unit, at our expense, with the same original configuration applied. Replacement units are shipped next working day with Parcelforce.

Cisco 887

- o This is supplied as a shelf mounted device (ie no rack mount kit)
- o These will be used for EoFTTC / GEA / EFM / ADSL & FTTC Failover
- o Should a hardware failure occur we will ship a replacement unit, at our expense, with the same original configuration applied. Replacement units are shipped next working day with Parcelforce.
- o We ship refurbished units which may be subject to light external imperfections, but nothing that will impact on service delivery. All refurbished units are fully tested prior to shipping.
- o This product is EOL and no longer officially supported by Cisco. For the most part, owing to the basic function that the router needs to perform, and the location in-front of your own firewalls and network, this should not pose an issue.
